

Monday 15 May

While our GCSE History students have already completed 2/3 of their final examinations, this week sees the start in earnest of many other subjects. Year 11 students are still expected in school every day and they have a programme that includes examinations, formal critically placed revision sessions and normal lessons. This means that students are still benefitting from the input of their teachers but that a programme of revision around the examinations ensures last minute preparation for each examination. Please see here [full the full timetable](#).

On Friday this week over 60 Year 9 students head to The Somme battlefields as a precursor to their GCSE History studies. With an early start, they will visit some of the key battle sites and understand how this campaign influenced the First World War.

On Monday selected students from Year 7 will enjoy a Gifted and Talented experience in Resistant Materials. This group has been selected from the skill and enthusiasm that they have shown in Design and Technology lessons this year and will experience some activities that stretch their creativity and skill.
